Project Overview

The Jupiter Centre is part of the Sunderland Software City project, an award winning, purpose built complex, designed specifically with software companies in mind.

Opus Building Services were employed by Tolent Construction Ltd to provide the complete design and installation of the mechanical and electrical services from general power and lighting and air conditioning to a fire alarm system and data wiring.

A prestigious new office development, Opus also incorporated an innovative bespoke lighting scheme providing a visually stimulating environment for visitors and staff alike.

OPUS carried out this project effectively and efficiently, ensuring all works were delivered to set deadlines and of the highest standard for business continuity and development.

Services included:

- Air-Conditioning
- General Power and Lighting
- Fire Alarm System
- Access Control
- BMS System
- Distributing System
- Data Wiring
- AHU Vent System and Controls
- LTHW System
- Decorative Feature Lighting/Scene Setting
