Project Overview

Opus Building Services were awarded a measured term contract from 2009-2013 by Newcastle upon Tyne NHS Hospitals Foundation Trust. The contract was for the design, supply, installation and maintenance of mechanical, electrical and plumbing building services incorporating heating, ventilation and air-conditioning services to the Trust estate including the Freeman Hospital, Royal Victoria Infirmary and Newcastle General Hospital.

Works include new and refurbishment to wards, lab theatres, offices and public areas; as well as the provision of data wiring installations and new energy efficient LED lighting and controls within various areas of the hospital estate. This includes a 24 hour repair, maintenance and call-out service.

All works continue to be successfully carried out to meet the client's requirements within a live busy hospital environment and with customer care as the key focus.

Services included:

- Full range of Mechanical, Electrical & Plumbing Services incl.
- General Power & Lighting
- Fire Alarm Systems
- Access Control
- UPS & IPS Systems
- Nurse Call Systems
- CCTV
- Data Wiring
- Patient Entertainment System
- AHU Ventilation Systems & Controls
- Medical Gasses
- Domestic Services
- Drainage Systems
- Heating Systems
