Perform

## Project Overview

The Stadium of Light is the home of Sunderland AFC. Built on the former site of the Monkwearmouth Colliery, the stadium has a 49,000 capacity, making it the fifth biggest football stadium in England.

Opus Building Services were employed by Tolent Construction Ltd to provide the design and build fit-out to the Executive Lounge which is used for corporate hospitality.

Works included alterations to power and distribution systems and the design, supply and installation of special feature lighting and controls to provide LED colour changing lights and controls units.

In an increasingly competitive environment, OPUS strives towards excellence in customer care and quality in delivering infrastructure projects for communities.

## Services included:

- Design
- Special Feature LED Lighting
- Control Units
- Power and Distribution Alterations
- Testing and Commissioning
